EXPERIENCE

NIKITA KOZLOV

and a lifelong interest in engineering.

DIGITAL FNGINFFR Figure Plant 2015 - Present

• Proposed, designed, and developed an internal web application to track and interpret data that has become an indispensable part of daily operations company-wide.

An experienced software engineer and systems architect with an

expansive knowledge of web languages, data modeling, and UI development. Possessing good written and verbal communication

- Drove a 15% increase in project margins by reducing workload through automation and standardization.
- Effectively implemented data visualization to support leadership in data-driven decision making.
- Communicated with clients and teammates to identify business needs and followed through by writing idiomatic code to create intuitive software.

2013 - 2014

- Co-authored a SaaS content management system for native mobile applications that was built with Node.
- Composed and consumed Restful APIs for web and mobile applications.
- Effectively collaborated with a distributed team of designers and developers using Git version control and software engineering best practices.
- Strategically leveraged cloud deployments and asynchronous data fetching to build high performance web applications.
- Built a reusable content management system using the MVC design pattern.
- Optimized sites for mobile browsing and UX with CSS preprocessors, ¡Query, and Bootstrap.
- Performed unit testing and non-functional testing of web applications in a Linux environment.
- Translated design files into database schemas and then functional sites with a focus on UX and performance.
- Cataloged a collection of front-end components to repurpose for future builds.
